

LEO GRAY

One boy. One moon. One million surprises!

About the Book

Who hasn't dreamed of going to the moon?

That dream for eleven-year-old Leo Gray is about to come true—but he's in for the surprise of his life! In the year 2113, most people live in robotically maintained homes, ride around in self-flying cars, and wear ozone-resistant clothes. Most people that is; just not Leo Gray's parents. They're stuck in the past, and science know-it-all Leo is completely fed up with his beyond-embarrassing living arrangement with them. But when he enters a rocket-building competition for a chance to attend the Lunar Academy, Leo's luck finally turns in his favor!
